The division Chemical Operations in Amsterdam has a wide selection of quality accounts in the chemical industry whose operations range from fine chemicals to petrochemicals.

To meet their development,

wants to strengthen the team in Belgium with a professional (F/M) for the function of :

## LOSS PREVENTION ENGINEER

### **FUNCTION:**

Working from home you will join our engineering department as **Loss prevention Consultant** working on major national and international accounts. You will be responsible for identifying and evaluating industrial property hazards and will work in close partnership with our clients to draw up and implement risk improvement programs. In this position you'll be dealing with real people and real situations, not just theories. It's a hands-on-job where you will need to be a problem solver, specialist and consultant, deciding how best to protect the companies for which you are responsible.

### **PROFILE:**

We are looking for a chemical engineer graduated from a leading Engineering school or university . The candidate should have a minimum of 3 years of experience ideally gained in fire or process safety in the Chemical industry. Your experience in the Process industry or with Power Generation will be supplemented by unrivalled training both in Europe and in the USA. Therefore your specialization for us is of lesser importance than your motivation and personality. Excellent listening, communication and negotiation skills in Dutch/French and English will enable you to build up solid working relations in a fast- moving international environment. You're a self-starter, hands-on and willing to travel within Europe.

### **OFFER:**

**FM Global** takes pride in its supporting, dynamic working environment which truly is a "global" community. Our corporate culture encourages professional growth, rewards achievement and allows flexibility and balance. We offer an attractive salary and benefits package including a company car.

If a multi-faceted career combining technical engineering skills and negotiating ability at top management level is what you are looking for, then don't hesitate. Forward your CV in English and a covering letter outlining your motivation and experience towards this vacancy to **SEARCH & SELECTION, att. Annemie Meert, Leuvensesteenweg 706, B-1930 Zaventem, Belgium. Fax: 0032 (0)2.759.22.68, email : [a.meert@searchselection.com](mailto:a.meert@searchselection.com).**
